Our plan is an Offensive plan

Why?

1. Going to a new market (Fayoum and Upper Egypt):

- The company is trying to take a chance in a place where no one is working yet.

That shows confidence and a strong move.

2. Depending on the future growth of digital services in Egypt:

- You're not just waiting for the market to grow - you're moving early and getting ready before others.

3. Clear plan to grow inside and outside Fayoum:

- This is not just staying safe. we have a plan to grow step by step in more places.

4. Using local advantages:

- Like fast help, good prices, and being the first in the area.
